Summary

I am a web developer having expertise in frontend development and exposure to back- end development. I design and develop web applications using the latest technologies to deliver the product with quality code.

Work Experience

○ Pranathi Software Service

Apr 2025 - present

Frontend UI Developer - Intern

- Design and developed a dynamic **TinyMCE editor** using React.js, Bootstrap, Redux, and JavaScript, featuring an **API-driven label sidebar**, OpenAI-powered autocomplete, and PDF export, doubling user engagement.
- Developed and published a **reusable useForm npm package** compatible with multiple React versions, enabling seamless integration across projects and improving development efficiency.

Key Projects / Involvements

AI Powered Movie Web Application [Link](#)

- Created an **intelligent search bar system** integrating OpenAI API and the TMDB API to provide real-time movie recommendations and advanced category-wise filtering based on user input.
- Implemented seamless **multi-language support** with Redux Toolkit, enabling dynamic language switching that enhanced user experience and engagement across diverse audiences.
- Developed a **robust authentication system** using Firebase Auth, delivering secure user login with modular APIs and unique user IDs, while maintaining a responsive, high-performance Netflix-style UI.
- Technologies Used:** React JS, HTML5, Tailwind CSS, JavaScript, Redux Toolkit, Firebase Auth, OpenAI

Social Connection Platform for Developers

- Built a structured and maintainable backend using Express.js and **MVC principles**, ensuring modular code organization, reusability, and scalability for future enhancements.
- Developed a robust authentication system with JSON Web Tokens (JWT) for secure user login and registration, enhancing **data protection** and access control.
- Created and tested efficient **RESTful APIs** for user, post, and notification management using Express.js and Mongoose, incorporating data validation, error handling, and middleware for a seamless application experience.
- Technologies Used:** Express.js, MongoDB, Mongoose, Postman

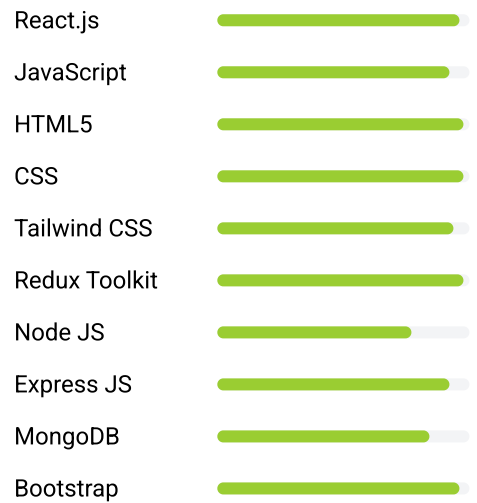

Certificates and Awards

- The Complete Web Development Bootcamp from Udemy. (May 2023)
- JavaScript - The complete guide from TCS ION. (May 2024)
- Object Oriented Programming from Simplilearn. (Nov 2024)
- Prepared a research paper and delivered a presentation at the **International Conference on CAIT 2025**

Career Objective

Eager to expand my skill set through external trainings to help boost all major frontend tech's. Hoping to leverage organizational skills to help Firm introduce time-saving schemes for all executives.

Technical expertise

Skills / Exposure

ES6 Responsive Web Design

DOM Manipulation Firebase

Methodology/Approach

Component based architecture
